

# CHRONIC KIDNEY DISEASE BY THE NUMBERS

Approximately 15% of U.S. adults have CKD with >678k having ESRD.

>120k new cases appear each year.

Up to 90% of kidney function can be lost before experiencing symptoms.

An ESRD patient's cost of care is 7x that of an average Medicare recipient.

ESRD patients are admitted to the hospital on average twice per year.

>97k people are on the kidney transplant wait list. Only half will get a kidney.
