Dialysis, personalized.

More options for your patients’ well being.

Discover the advanced peritoneal dialysis (PD) system with improved features for added control and convenience during your patients’ treatment experience.
You asked for more. We answered.

In a recent market survey, dialysis nurses and patients talked about their needs for a home dialysis system. As they shared their experiences, participants said they wanted a cycler that was easy to use, technologically advanced, and offered simple patient training resources and ongoing support.¹

Our answer? The Liberty® Select cycler, featuring customizable treatment options for added control and convenience during your patients’ PD experiences.

Fresenius Renal Technologies, a leading provider of dialysis products and services, is pleased to bring you the Liberty Select cycler, the next generation of the Liberty cycler.
Enhancing PD

With features like an easy-to-read, full-color touchscreen, patient-friendly disposables and a portable design, the Liberty Select cycler will help make your patient’s experience as simple and convenient as possible.

Intuitive user interface

Easy-to-follow prompts and step-by-step instructions keep the patient on track during their treatment, while illustrated instructions and color-coded status alerts help correct any problems they encounter along the way.

Colorful buttons on the touchscreen

Easy-to-follow, illustrated, on-screen instructions
Responsive alerts and step-by-step troubleshooting guidance
Technology designed to improve the patient experience

- Soft alarm gently reminds patients to change position when their line becomes blocked. Alarm automatically stops when patient changes position and unblocks the line.
- Portable design makes it easy to fit on a nightstand or living room side table; optional cart and travel case are also available.
- IQsystem® software lets you monitor and manage your patient’s data, helping you update treatment settings, as needed, and monitor compliance.
As its name implies, the Liberty Select cycler offers more “selections” than our previous cycler, including additional options for a better drain experience.

New drain options include:

- **STAT drain at the end of treatment**—Allows patient to perform an unplanned drain at the end of treatment, while still connected to the cycler

- **Additional drain exit criteria**—Provides two drain exit criteria settings (70% and 85%) to help minimize alarms and the risk of overfilling

- **Additional planned drain option**—Allows user to add an additional, planned drain in the last fill of the last cycle, or after the last drain, to help remove more fluid from the abdomen; feature can be programmed in advance
stay•safe® connectology system

With more than 20 years of proven and reliable use, our stay•safe connectology system’s unique design makes it easy for patients to learn and perform their PD treatments at home. More importantly, fewer system openings and our patented PIN technology help reduce the risk of touch contamination.

- Patented PIN seals the fluid pathway prior to disconnect, minimizing potential for touch contamination
- Simple disconnect procedure
- Easy to transition from CAPD to APD
PD Plus™ therapy

Designed by PD pioneer Dr. Jose Diaz-Buxo in 1996, PD Plus is a hybrid therapy with an extra exchange that can help to enhance clearance and ultrafiltration, without the use of icodextrin. PD Plus can allow for a continuous, around-the-clock PD regimen, which is in accordance with the International Society of Peritoneal Dialysis' recommendations.

- Helps optimize PD prescriptions for improved clearance and ultrafiltration rates
- Requires no additional dialysate solution types, minimizing logistic burden
- Option for anuric and larger body size patients who have difficulty achieving their target Kt/v

For more information on PD Plus therapy, call our success@home™ Clinical Resource Line at 1-877-954-3340.
Training resources and ongoing support

At Fresenius Renal Technologies, we know the importance of ongoing support and simple, easy-to-use patient training tools to help ensure a successful PD experience.

Support program
Designed to provide simple, helpful information, our program includes educational flyers, worksheets, training videos, and other resources to help your patients succeed at home, while providing peace of mind for the treatment team.

success@home™ Clinical Resource Line: 1-877-954-3340
Staffed by an experienced team of Medical Information Clinicians, the success@home Clinical Resource Line offers training and educational support related to our home therapies products from Monday through Friday, 8:30 AM to 5:00 PM, ET.

Customer service: 1-800-323-5188
Available 24 hours a day, 7 days a week to assist with PD supply orders, supply deliveries, product returns, and more.

Technical support: 1-800-227-2572
Available 24 hours a day, 7 days a week to provide troubleshooting guidance and technical support related to our products.
Delivery service

Liberty Select cycler supplies are delivered to your patient’s door by TruBlu Logistics®, a specialized delivery service. Our drivers are specifically trained to deliver your patient’s supplies to their storage area, count their inventory, and return any expired, overstocked, or damaged supplies.

Read the Instructions for Use for safe and proper use of these devices. For a complete description of hazards, contraindications, side effects, and precautions, see full package labeling at www.fmcna.com.

Indications for Use: The Liberty Select cycler is indicated for acute and chronic peritoneal dialysis. The stay•safe PIN connectors are intended for use with a peritoneal dialysis cycler for drainage and infusion of PD solution during peritoneal dialysis exchanges. The stay•safe PIN connectors are indicated for acute and chronic peritoneal dialysis.

Caution: Federal (US) law restricts these devices to sale by or on the order of a physician.

For more information on the Liberty Select cycler or our support programs, contact your local Fresenius Renal Technologies representative. You can also call our Customer Service team at 1-800-323-5188, or visit our website at www.fmcna-libertyselect.com.
